

CapitalPilot

To Whom it May Concern,

Letter of Recommendation - Maverik Gately

Maverik Gately was appointed as Senior Software Engineer on 4th September 2023.

His role involved all aspects of development work on the Capital Pilot platform, including new features, streamlining of existing code, maintenance and support issues.

On October 13th 2023, the company was placed into administration, and all of the staff were made redundant on October 25th.

In his brief role with the company Maverik made a considerable impact. His energy and enthusiasm were immediately apparent, and he quickly mastered the platform and the technology roadmap. Within two weeks he was participating fully in roadmap and design discussions, and leading new software releases. His productivity has continued to grow.

Reports from other members of the Engineering and Product teams confirm Maverik's technical prowess, problem-solving capabilities, and strong work ethic.

Maverik has, from the start, shared his intention to be an integral part of the team rather than a back office function. He has proactively sought out engagement with the Product, Customer Success and Business Development teams to bring his own ideas into problem solving and product development. He is happy to challenge the opinions of others, doing so in an inquisitive and collaborative way.

Maverik clearly enjoyed being part of a team with a mission, looking to stretch the boundaries of early-stage investment, and he participated fully and added significant value in the short time he was able to work for the company.

It has been a privilege to work with Maverik. It is a great shame that the company's financial issues brought a premature end to his work with the company. I am delighted to recommend him for any senior engineering role where he can utilise his strong technical, feature design and collaboration skills. I would not hesitate if the opportunity to work with him again presented itself in the future.

Please feel free to contact me for any further information.

Yours sincerely,

Richard Blakesley
